

StadOnClick User Manual (Non-Technical)

From registration -> customer use -> becoming a vendor -> onboarding, KYC, services, offerings, and going live in marketplace.

1. Start as a Customer

1. Open the app and choose Sign Up.
2. Enter your phone number and verify with OTP (code sent to phone).
3. Fill your basic details:
 - Name
 - Email
 - Password
 - Address/city
4. Finish signup and log in.

You are now a Customer account.

2. Use the System as a Customer

1. Go to Marketplace.
2. Browse services by category, city, price, and rating.
3. Open a service to see:
 - Vendor details
 - Pricing options
 - Available offerings

4. Add your selected option and continue to checkout.
5. Pay securely.
6. After payment, open Order Confirmation to see receipt and order details.
7. Use Wishlist to save services for later.
8. Use Account to manage profile and shipping addresses.

3. Move from Customer to Vendor

If you want to sell services:

1. Open Business Onboarding.
2. Create your business profile.
3. Submit business details.
4. Once profile is created, your account gets vendor access.

You now have vendor-side menus and dashboard.

4. Vendor Onboarding (Step-by-Step)

4.1 Complete Business Profile

Fill all business basics carefully:

1. Business name
2. Description
3. City/location
4. Headquarters/address
5. Service overview
6. Business hours
7. Contact email and/or phone

The screenshot displays the 'StadorClick Vendor' interface for completing a business profile. The left sidebar contains navigation menus for Overview, Business Account, Operations, Sales, and Monetization. The main content area is titled 'Business Profile' and includes a profile card for 'clothing store' with a 'PENDING REVIEW' status. The profile card shows a profile picture, business name, and coordinates. Below the card are buttons for 'Verification KYC' and 'Finance Wallet'. The main form area has tabs for 'Profile Info', 'SEO & Visibility', 'Contact & Location', 'Business Hours', and 'Preview'. The 'Profile Info' tab is active, showing fields for 'BUSINESS NAME *' (filled with 'clothing store'), 'CITY' (a dropdown menu), 'DESCRIPTION' (a text area filled with placeholder text), 'HEADQUARTERS' (filled with coordinates), and 'SERVICES FOCUS' (filled with 'clothing brand'). A 'Save Changes' button is at the bottom right. A 'Setting' section on the left of the main form includes links for 'Personal information', 'Support', and 'View Public Profile'. A 'Next: SEO & Visibility' link is at the bottom of the main form. An 'Activate Windows' watermark is visible in the bottom right corner.

Tip: Complete all required fields to avoid setup blocks.

4.2 KYC Verification

Go to Vendor KYC and upload required documents (for example):

1. Government ID
2. Business license
3. Tax document
4. Bank proof

Then wait for review:

- PENDING: under review
- APPROVED: accepted
- REJECTED or reupload request: upload corrected document

4.3 Connect Stripe (Payments/Payouts)

After KYC is approved:

1. Open Vendor Stripe
2. Connect Stripe account
3. Complete Stripe onboarding form
4. Confirm payouts/charges are enabled

Without this, payouts may not work.

5. Set Up Your Service Catalog

5.1 Create Services

In vendor services area:

1. Add service title and description
2. Select category
3. Add location/map coordinates if needed
4. Upload media/images
5. Save

5.2 Create Offerings (Variants You Sell)

Each service can have multiple offerings. Example:

- “Basic Package”
- “Premium Package”

For each offering set:

1. Offering name
2. Base price / sale price
3. Quantity/capacity
4. Currency
5. Optional rules (like duration)

5.3 Create Slots (If Time-Based)

For booking-style offerings:

1. Add date/time slots
2. Set capacity per slot
3. System automatically tracks remaining spots

5.4 Add Menu/Media

Upload gallery/menu media so customers see clear visuals.

5.5 Add Coupons (Optional)

Create discount codes for your customers:

1. Code
2. Type (FLAT or %)
3. Value
4. Valid date range
5. Usage conditions

6. Make Services Live in Marketplace

1. Ensure service status is LIVE.
2. Confirm offering prices and media are complete.
3. Check business profile is active.
4. Verify KYC and Stripe are done.
5. Your service appears in marketplace search and listing.

Optional: buy Sponsorship to boost visibility.

7. Daily Vendor Operations

Use vendor dashboard for:

1. Bookings
 - View upcoming/completed/refund-related bookings
 - Update booking status
2. Orders
 - Track paid/pending orders
3. Leads
 - Receive leads

- Change lead status (NEW -> CONTACTED -> CONVERTED/LOST)

4. Wallet

- View earnings, fees, balances
- Request payout

5. Support

- Create support ticket
- Chat with support team

8. Full Customer -> Vendor -> Marketplace Lifecycle (Simple Flow)

1. Register with OTP
2. Become customer
3. Browse and place orders
4. Decide to sell -> start business onboarding
5. Complete business profile
6. Upload KYC docs
7. Get KYC approved
8. Connect Stripe
9. Create services
10. Create offerings and slots

11. Upload media/menu
12. Set service live
13. Receive bookings/orders/leads
14. Manage wallet and payouts
15. Grow via promotions/sponsorship

9. Common Status Meanings (Simple)

- Vendor profile: PENDING_REVIEW, ACTIVE, SUSPENDED, REJECTED
- KYC: NOT_SUBMITTED, PENDING, VERIFIED, REJECTED
- Service: DRAFT, LIVE, PAUSED
- Order: PENDING, PAID, CANCELLED, REFUNDED
- Booking: CONFIRMED, CANCELLED, COMPLETED

10. Quick Success Checklist for New Vendors

1. Business profile completed
2. KYC approved
3. Stripe connected (charges + payouts enabled)
4. At least 1 service created
5. At least 1 offering with correct pricing
6. Slots added (if booking-based)
7. Service marked LIVE
8. Media uploaded
9. Test booking done

Specific Roles workflow

Customer to Vendor Journey (Vendor)

Document Control

- SOP Name: StadOnClick - Customer to Vendor Activation
- Audience: Support Team, Vendor Onboarding Team, Operations Team
- Objective: Guide a user from registration to a fully live marketplace vendor

Scope

- Starts at: User registration
- Ends at: Vendor service live and discoverable in marketplace

Step 1. Customer Registration Support

1. Ask user to open Sign Up.
2. Confirm user enters phone number and requests OTP.
3. Confirm OTP is received and verified.
4. Confirm user completes profile fields (name, email, password, address/city).
5. Confirm account login is successful.

Completion Criteria

- User can sign in.
 - User can access customer pages (marketplace, account, wishlist).
-

Step 2. Customer Readiness Check

1. Ask user to browse marketplace and open at least one service.
2. Ask user to test wishlist save.
3. Ask user to verify account profile is complete.

Completion Criteria

- Customer flows work correctly.
 - No profile or access error blocks.
-

Step 3. Transition User to Vendor Path

1. Ask user to open Business Onboarding.
2. Explain vendor requirements before proceeding:
 - Business profile completion
 - KYC verification
 - Stripe connection
3. Confirm user wants to proceed as business seller.

Completion Criteria

- Vendor onboarding process started.
 - Vendor profile draft exists.
-

Step 4. Vendor Business Profile Setup

1. Verify user fills:
 - Business name
 - Description
 - City/location
 - Headquarters/address
 - Service overview

- Business hours
 - Contact email or phone
2. Check all mandatory fields are saved.
 3. Confirm vendor status is not blocked.

Completion Criteria

- Business profile is complete.
 - Vendor can access vendor dashboard sections.
-

Step 5. KYC Submission and Review

1. Ask vendor to upload required documents:
 - Government ID
 - Business license
 - Tax document
 - Bank proof
2. Confirm documents uploaded successfully.
3. Monitor KYC review status.
4. If rejected or reupload requested, guide user to upload corrected file.
5. Repeat until approved.

Completion Criteria

- KYC status is VERIFIED/APPROVED.
-

Step 6. Stripe Connection for Payments

1. Ask vendor to open Vendor Stripe.
2. Start Stripe onboarding flow.
3. Confirm vendor completes Stripe form.
4. Verify both are enabled:
 - Charges enabled
 - Payouts enabled

Completion Criteria

- Stripe account connected.

- Vendor is payout-ready.

Step 7. Service Creation SOP

1. Open vendor Services.
2. Create service with:
 - Service title
 - Description
 - Category
 - Location/map details if required
3. Upload service media/images.
4. Save service.

Completion Criteria

- At least one valid service exists.
- Service content is customer-ready.

Step 8. Offering Creation SOP

1. Open service Offerings.
2. Create at least one offering per service:
 - Offering name
 - Base price
 - Sale price
 - Quantity/capacity
 - Currency
3. Add duration/rules if required.
4. Save offering.

Completion Criteria

- At least one purchaseable offering exists under service.

Step 9. Slot Setup SOP (If Time-Based Service)

1. Open Slots.

2. Add date/time slots.
3. Set capacity per slot.
4. Save and confirm slots are open.

Completion Criteria

- Slot inventory available for booking.
-

Step 10. Optional Menu/Media and Coupons

1. Upload menu media (if relevant category).
2. Create optional coupons:
 - Code
 - Discount type
 - Value
 - Validity window
3. Save and validate display.

Completion Criteria

- Optional sales assets configured correctly.
-

Step 11. Publish to Marketplace

1. Change service status to LIVE.
2. Confirm service appears in marketplace listing.
3. Verify:
 - Service details visible
 - Offering prices visible
 - Booking/purchase path works

Completion Criteria

- Vendor is discoverable and transactable in marketplace.
-

Step 12. First Transaction Validation

1. Perform one test booking/order (real or controlled test).

2. Confirm order status flow works.
3. Confirm booking appears in vendor bookings.
4. Confirm payment confirmation is generated.
5. Confirm vendor wallet/earnings ledger updates.

Completion Criteria

- End-to-end transaction cycle validated.
-

Step 13. Post-Go-Live Vendor Training

1. Train vendor on daily operations:
 - Bookings status updates
 - Leads management
 - Wallet and payout requests
 - Support tickets
2. Share escalation path for payment/KYC/support issues.

Completion Criteria

- Vender can operate independently.
-

Exception Handling SOP

1. OTP not received: retry OTP flow, verify phone format.
 2. KYC rejected: share exact correction reason, reupload guidance.
 3. Stripe incomplete: reopen onboarding and complete pending requirements.
 4. Service not visible: verify status is LIVE, offering exists, no compliance block.
 5. Payout issues: verify Stripe payouts enabled and wallet balance available.
-

Final Go-Live Checklist (Mandatory)

1. Customer account active.
2. Vendor profile complete.
3. KYC approved.
4. Stripe connected with payouts/charges enabled.
5. At least one LIVE service.
6. At least one active offering.

7. Slots configured (if applicable).
8. Marketplace visibility confirmed.
9. First transaction tested.
10. Vendor trained on operations.

ADMIN WORKFLOW

Admin Side SOP (Staff Training)

Covers the full Admin Dashboard workflow and every item in the Admin sidebar.

1. Access Rules Before Starting

1. Go to /admin/sign-in.
2. Sign in with staff account.
3. Confirm your role:
 - ADMIN: full sidebar and full control
 - SUPPORT_ADMIN: only support tools + system health
 - MODERATOR: only moderator tools + system health

2. Sidebar Variants (What each role sees)

1. Full Admin sidebar (ADMIN) includes:

- Overview
- Vendor
- Customers
- Users
- Bookings
- Compliance
- Leads & Monetization
- Coupons
- Finance
- Support Inbox
- Support Dashboard
- Support Chat
- Catalog
- System
- System Health

3. Full Admin SOP by Sidebar Item

3.1 Overview (Dashboard)

Purpose: Monitor platform KPIs and operating health.

Steps:

1. Open Overview.
2. Check daily KPI cards and trend signals.
3. Identify red flags:
 - sudden drop in bookings
 - payout backlog
 - KYC queue spikes
4. Create task tickets for affected teams.

Done when:

- Daily health review completed.

- Critical anomalies assigned.
-

3.2 Vendor (Vendors, Vendor Services, Offerings)

Purpose: Manage vendor lifecycle and listing quality.

A) Vendors

1. Open Vendor > Vendors.
2. Review vendor profile status and activity.
3. Open vendor profile page for details.
4. Approve, suspend, reject, or update status as needed.

B) Vendor Services

1. Open Vendor > Vendor Services.
2. Review service quality, category, content, and policy fit.
3. Edit or remove policy-violating or poor-quality services.

C) Offerings

1. Open Vendor > Offerings.
2. Review pricing/options and availability status.
3. Toggle offering status individually or in bulk.

Done when:

- Vendor status is correct.
 - Services/offerings are compliant and market-ready.
-

3.3 Customers

Purpose: Monitor customer base and support business growth.

Steps:

1. Open Customers.
2. Review customer list and usage pattern.
3. Investigate customer complaints, suspicious activity, or churn signals.
4. Coordinate with support for unresolved customer issues.

Done when:

- Customer risks/escalations are assigned and tracked.
-

3.4 Users (Staff Users, Affiliate Users)

Purpose: Control staff access and affiliate user operations.

A) Staff Users

1. Open Users > Staff Users.
2. Create new staff user when needed.
3. Assign role correctly (SUPPORT_ADMIN or MODERATOR etc.).
4. Disable or change role for offboarded or reassigned staff.

B) Affiliate Users

1. Open Users > Affiliate Users.
2. Monitor affiliate accounts and performance.
3. Investigate abuse or referral fraud patterns.

Done when:

- Access control is accurate.
 - No unauthorized staff access remains active.
-

3.5 Bookings (All, Upcoming, Completed, Refunds)

Purpose: Central booking operations and exception handling.

A) All Bookings

1. Open Bookings > All Bookings.
2. Filter by vendor, status, or date.
3. Investigate booking disputes and anomalies.

B) Upcoming

1. Confirm upcoming bookings are valid and operationally feasible.
2. Escalate capacity or slot conflicts.

C) Completed

1. Audit completed bookings for payout/revenue reporting.

D) Refunds

1. Open Bookings > Refunds.
2. Review refund-related cases.
3. Coordinate with finance/support for final action.

Done when:

- Booking exceptions are resolved or escalated with owner and ETA.
-

3.6 Compliance (KYC Review Queue, KYC Audit Logs)

Purpose: Vendor compliance and legal safety.

A) KYC Review Queue

1. Open Compliance > KYC Review Queue.
2. Review each vendor document.
3. Action options:
 - Approve
 - Reject (with reason)
 - Request reupload (with reason)

B) KYC Audit Logs

1. Open Compliance > KYC Audit Logs.
2. Validate that every KYC action has traceability.

Done when:

- Queue remains within SLA.
 - Every rejection has clear reason.
-

3.7 Leads & Monetization

Purpose: Manage lead economy and monetization controls.

A) Lead Plans

1. Open Leads & Monetization > Lead Plans.

2. Create/update plan price, duration, lead quota.
3. Deactivate outdated plans.

B) Vendor Subscriptions

1. Open Vendor Subscriptions.
2. Track who is subscribed, active, expired.
3. Handle billing mismatch with support/finance.

C) Sponsorship Plans

1. Open Sponsorship Plans.
2. Create or edit boost plans for marketplace visibility.
3. Ensure pricing and priority logic is aligned with policy.

D) Coupons

1. Open Coupons.
2. Create platform coupons or deactivate misuse.

3.8 Coupons (Direct Shortcut)

Purpose: Same function as coupon section above.

Steps:

1. Open Coupons.
2. Create campaign coupon.
3. Deactivate abused or expired campaigns.

Done when:

- Only valid campaigns are active.

3.9 Finance (Payout Requests, Platform Wallet)

Purpose: Revenue integrity and payout governance.

A) Payout Requests

1. Open Finance > Payout Requests.
2. Review pending vendor payout requests.
3. Approve or reject with reason and traceability.

Note:

- Sidebar label says “Disabled” in UI text, but page exists. Follow current internal finance policy before acting.

B) Platform Wallet

1. Open Finance > Platform Wallet.
2. Review platform transactions and revenue streams:

- commissions
- subscription fees
- sponsorship fees

3. Reconcile unexpected deltas with bookings/payments team.

4.

The screenshot displays the StaddonClick Treasury Console. The left sidebar contains a navigation menu with items: Overview, Vendor, Customers, Users, Bookings, Compliance, Leads & Monetization, Coupons, Finance (highlighted), Support Inbox, Support Dashboard, Support Chat, Catalog, System, and System Health. The main panel is titled 'Treasury Console' and shows a 'Platform Treasury VERIFIED SYSTEM BALANCE' section with 'AVAILABLE REVENUE' at SEK 599.97 and 'PENDING LIABILITIES' at SEK 0.00. Below this is a 'REVENUE LEDGER' table with columns for 'SOURCE MERCHANT', 'REVENUE YIELD', and 'SYNC DATE'. The table lists three entries: 'clothing store' (SEK 199.99, 21 Feb. 2025), 'Platform Revenue' (SEK 199.99, 21 Feb. 2025), and another 'Platform Revenue' entry (SEK 199.99, 18 Feb. 2025). A system message at the bottom right indicates 'activate Windows'.

Done when:

- Daily wallet check is complete.
- Payout queue and reconciliation are clean.

3.10 Support Inbox / Support Dashboard / Support Chat

Purpose: Resolve vendor support tickets quickly.

A) Support Inbox

1. Triage tickets by priority and status.
2. Assign owner to each ticket.
3. Move ticket through status workflow.

4.

B) Support Dashboard

1. Review queue volume, response SLA, backlog aging.
2. Rebalance load among staff.

C) Support Chat

1. Join assigned ticket conversation.
2. Reply and update status.
3. Escalate difficult cases to moderator flow.

Done when:

- No unowned critical tickets.
- SLA breaches are controlled.

3.11 Catalog (Preference Studio)

Purpose: Maintain customer preference catalog used in onboarding/discovery.

Steps:

1. Open Catalog > Preference Studio.
2. Update interests/time-duration definitions.
3. Keep labels and ordering clean for user experience.

Done when:

- Catalog is up to date and consistent.

3.12 System (API Docs, Admin Activity) + System Health

Purpose: Technical observability and platform reliability.

A) System

- API Docs and Admin Activity appear in sidebar.
- In current routing, primary implemented operational page is System Health.
- Use system links per current release availability.

B) System Health

1. Open System Health.
2. Verify API, infra, and key service indicators.
3. Escalate production incidents immediately.

Done when:

- Incident status is documented and assigned.

3.13 Moderator Area (if role includes moderator)

Purpose: Resolve escalated disputes/risk cases.

Steps:

1. Open Moderator Dashboard.
2. Open Escalations.
3. Accept escalation ownership.
4. Update status (IN_PROGRESS, BLOCKED, RESOLVED, REJECTED).
5. Add resolution comments.
6. Check Notifications for new assignments.

Done when:

- Escalations are closed with documented resolution.

CUSTOMER WORKFLOW

Customer Flow Description (End-to-End, Non-Technical)

1. Discover and Join

1. Customer opens StadOnClick app/site.
2. Clicks Sign Up.
3. Enters phone number and receives OTP.
4. Enters OTP to verify phone.
5. Completes profile details (name, email, password, etc.).
6. Account is created and customer is logged in.

Result: customer profile is active and ready to use.

2. Browse Marketplace

1. Customer goes to Marketplace.
2. Uses filters like category, city, price, rating.
3. Opens a service detail page.
4. Reviews:
 - vendor info
 - available offerings/options
 - prices
 - media/images

Result: customer identifies what to book/buy.

3. Add Preferences (Optional)

1. Customer can set interests and preferred times.
2. Platform uses these preferences to improve experience.

Result: better personalization and recommendations.

4. Save Favorites (Optional)

1. Customer adds services to Wishlist.
2. Returns later to compare or purchase.

Result: easier decision-making later.

5. Create Booking/Order

1. Customer selects offering (and slot, if time-based).
2. Starts checkout.
3. System creates a pending order.
4. Customer applies coupon (if available).
5. Final amount is shown.

Result: order prepared for payment.

Activate Windows
Go to Settings to activate Windows.

6. Payment

1. Customer is redirected to secure Stripe checkout.
2. Completes card payment.
3. On success, customer returns to confirmation page.

Result: order status becomes paid and booking is confirmed.

7. Confirmation and Receipt

1. Customer opens Order Confirmation page.
2. Sees:
 - order ID
 - booking/offering details
 - payment details/receipt reference
3. Confirmation email is sent (when configured).

Result: customer has proof of booking and payment.

8. Post-Booking Actions

1. Customer can check past/current orders in Orders.
2. Can contact support if any issue.
3. Can continue browsing and place more bookings.

Result: full repeat customer lifecycle.

9. Referral and Affiliate Influence (Behind the scenes)

1. If customer came via referral/affiliate link, tracking is captured.
2. Eligible rewards/commissions are processed after successful paid booking.

Result: referral ecosystem works without extra customer effort.

10. Transition from Customer to Vendor (Optional Path)

1. Customer chooses to become a business seller.
2. Starts business onboarding from profile/business onboarding entry.
3. Completes vendor setup, KYC, Stripe, service setup.
4. Becomes active vendor while still retaining customer account identity.

Summary

1. Customer Flow

1. User signs up with phone OTP.
2. Completes basic profile and logs in.
3. Browses marketplace services.
4. Opens service details and selects offering/slot.
5. Proceeds to checkout and pays via Stripe.
6. Receives order confirmation and can view orders.
7. Uses wishlist, account settings, and support when needed.

2. Vendor Flow

1. Existing customer starts business onboarding.
2. Creates vendor profile and fills business details.
3. Uploads KYC documents and waits for approval.
4. Connects Stripe account for charges/payouts.
5. Creates services.
6. Creates offerings (price/options/capacity).
7. Creates slots (if booking-based).
8. Uploads media/menu and sets coupons (optional).
9. Sets service status to LIVE.
10. Starts receiving bookings, leads, and wallet earnings.

3. Admin Flow

1. Admin signs in and opens dashboard.
2. Reviews platform KPIs and health.
3. Manages vendors, services, offerings, and applications.
4. Reviews KYC queue and audit logs.
5. Manages customers, staff users, affiliate users.
6. Handles bookings (all/upcoming/completed/refunds).
7. Controls lead plans, subscriptions, sponsorship plans, coupons.
8. Reviews finance: payout requests and platform wallet.
9. Runs support operations (inbox/dashboard/chat).
10. Uses system health for operational monitoring.

4. Moderator Flow

1. Open moderator dashboard.
2. Review escalation queue.
3. Accept escalation ownership.
4. Update status (IN_PROGRESS, BLOCKED, RESOLVED, REJECTED).
5. Add comments and final resolution.
6. Monitor moderator notifications.
